Overview: “Life is like riding a bicycle. To keep your balance, you must keep moving” – Albert Einstein

In an increasingly complex and uncertain world, it is likely that most of us have experienced some form of work-related unease, anxiety, stress, or fatigue. In constant pressure, we enter on survival mode forgetting to think about our emotional, physical and mental well-being. To thrive, it is important not only to restore the balance between work and personal life but also cultivate the ability to reflect, learn, rebound, and move forward.
