Dental
Protection

Date Saturday 20 August 2016

Time 08.30 - 17.30

Networking Social 17.30 - 19.30

Venue Powerhouse Museum, 500 Harris St, Ultimo NSW 2007

SPEAKERS

Dr Jonathan Moore

Dr Jonathan Moore graduated with honours from the University of Queensland in 2003. He completed his Doctor of Clinical Dentistry in Endodontics at the University of Melbourne and was awarded Membership of the Royal Australasian College of Dental Surgeons in the special field of Endodontics in 2008. Dr Moore has been a lecturer at ADA conferences, he regularly runs hands on courses for rotary NiTi and is a guest lecturer at Griffith University. Dr Moore works at the Endodontic Group in Queensland which is currently the largest private specialist endodontic practice in Australia with ten endodontists and six branches in the Brisbane, Gold Coast and Sunshine Coast areas.

Stephanie Lorenzo

Stephanie Lorenzo founded Project Futures to empower a generation to raise awareness and funding to combat human trafficking and sexual exploitation globally. Stephanie has made the charity active and fun for young people and has raised hundreds of thousands of dollars in the process. Stephanie's leadership approach has enabled her to mobilize young professionals to engage in creative, innovative and sustainable fundraising initiatives as she believes that young people are driven by purpose. Project Futures community have raised over \$2.1 million for their anti-trafficking projects in only 5 years of operation, 3 of which were part time and voluntary.

Dr Annalene Weston

Dr Annalene Weston has previously worked both in general dental practice and in Government Health Service positions, in both Victoria and New South Wales before moving to Queensland where she has been based in recent years. She was awarded a Masters Degree in Health Law from Sydney University. Until recently Annalene was practising in Central Queensland and serving on the local HCC; however, she is now based in Brisbane and, in addition to her role with Dental Protection Limited, Annalene works part-time in a suburban dental practice.

Dr Andre Bendyk

Dr Andre Bendyk runs a full time specialist private practice in Adelaide limited to Periodontics and Implant Dentistry. He lectures nationally to dental study groups. He is a past President of the Australian Society of Periodontology (SA Branch) and a Fellow of the Royal Australasian College of Dental Surgeons.

Dr David McIntosh

Dr David McIntosh is an adjunct Associate Professor of ENT in Queensland. He specialises in paediatric ENT, nose and sinus disease, and snoring and sleep apnoea. He is an internationally recognised specialist in the field of the interplay between ENT and dentistry. He is the founder of one of the largest ENT services in Australia and runs the largest education service in the world for dentists and doctors on ENT. He also runs the online Facebook pages "ENT for dentists" and "ENT updates for the GP".

WELCOME

Dental Protection is pleased to present the 5th annual Young Dentist Conference. Designed for dentists in their first six years following graduation, the conference is a must for dentists in the early years of their career, offering an innovative and entertaining program that is unlike any other.

YDC 2016 will deliver challenging ideas, facts and practical tips with an emphasis on how various issues impact upon young dentists, providing powerful insights from a panel of top speakers.

Dr Jonathan Moore

Stephanie Lorenzo

Dr David McIntosh

Dr Annalene Weston

Dr Andre Bendyk

Conference convened by Dr George Lazaridis and Dr Mike Rutherford.

PROGRAM

08.30 - 09.30 Registration, refreshments and exhibition

09.30 - 09.45 Welcome and Introduction

09.45 - 10.55 Dr Jonathan Moore – **The “root” to success in endodontics**

Endodontic treatment attracts the highest number of complaints in dentistry and recent graduates in particular seem to account for a large proportion of those. In this presentation, Dr Moore will highlight some of the common areas where mistakes are made and show you how to avoid them. He will also discuss conservative access and how that fits with modern endodontics and improved patient outcomes.

10.55 - 11.05 Questions for Dr Jonathan Moore

11.05 - 11.35 Refreshments and exhibition

11.35 - 12.15 Dr Annalene Weston – **Light-bulb moments**

Noun - a moment of sudden realisation, enlightenment or inspiration

How many dentists does it take to have a light bulb moment? There can be no doubt that daily life involves a certain amount of trial and error, and the daily practice of dentistry is no exception. But what if we could identify the risks of practice and distill them out into a meaningful way? The good news is, we can! This presentation will highlight the factors which most commonly lead to complaints in general practice, and outline the steps we as practitioners can take to prevent these and protect ourselves from patient complaints and regulatory challenge. Examples of recent graduate cases will be presented throughout, to enable us to have a collective ‘light bulb moment’ and perhaps learn from the mistakes of others along the way.

12.15 - 12.20 **Questions for Dr Annalene Weston**

12.20 - 13.00 **Stephanie Lorenzo – Unlocking Purpose Driven Leadership**

With the business environment continually in a state of change, it is imperative that what drives performance is authentic for each individual, and aligned with the overall objectives of your organisation. Through understanding how to activate and implement the purpose of individuals, we are able to mobilize our teams and gain valuable insights into what really motivates them to perform, and is not influenced by variable 'carrots' such as profit or power. Audiences will leave this session with the tools to identify individual or shared purpose, enabling them to integrate human motive into an outcome driven leadership strategy.

13.00 - 13.05 **Questions for Stephanie Lorenzo**

13.05 - 14.05 **Lunch and exhibition**

14.05 - 15.15 **Dr Andre Bendyk – Periodontics and Implant Dentistry: Stand with solid footing**

In a clinically based lecture Dr Bendyk will discuss the standard of patient care in Periodontics and Implant Dentistry, helpful approaches to identifying future problems before they arise and practical options and clinical techniques for managing difficult situations. A number of cases will be discussed illustrating positive outcomes as well as problematic results and how they may have been avoided.

15.15 - 15.25 **Questions for Dr Andre Bendyk**

15.25 - 15.55 **Refreshments and exhibition**

15.55 –17.05 **Dr David McIntosh – Why every dENTist needs an ENT**

Dentists and Ear, Nose and Throat Specialists share the common territory of the oral cavity. But how much dentistry do ENT doctors get taught? And how much ENT do dentists get taught? The answer to both questions is probably the same - none. And what if there were dental conditions that ENTs should know about as they may impact on ENT conditions? And what if there were ENT problems that impacted on dental presentations? Think you know about bruxism? What about periodontal disease? Then you would know how birch pollen exposure is important right? Hmmm. Today's lecture is about connecting dots and building bridges. Learn some basic concepts of ENT and how it relates to dentistry. After today, your viewpoint and perspective will be radically different. And that's a good thing for both your professional knowledge and subsequent patient care.

17.05 - 17.15 **Questions for Dr David McIntosh**

17.15 - 17.30 **Young Dentist Award Ceremony and conference close**

17.30 - 19.30 **Networking Social**

Please join us at the Collider Exhibition for refreshments, light food and entertainment. This is an excellent networking opportunity and a time to relax and catch up with friends. The Collider Exhibition will transport you into the heart of one of the greatest scientific experiments of our time: the Large Hadron Collider. Collider provides a behind-the-scenes look at the CERN particle physics laboratory in Geneva in the first exhibition of its kind, offering the closest experience possible to visiting the famous site itself.

BOOK A PLACE

Book online: dentalprotection.org.au

For more information contact:

The Registration Team

E: education@dpla.com.au

T: 07 3511 5005

Tickets:

\$70 discounted rate for Dental Protection Limited members

\$170 non-members of Dental Protection Limited

Exclusive offer for non-members of Dental Protection Limited

Join Dental Protection Limited before 30 June 2017 and we will refund \$100 of the ticket price

The conference price is discounted for members of Dental Protection Limited as a benefit of membership. If you are a non-member and attend the conference, we will refund \$100 of the ticket fee if you join by 30 June 2017.

To find out more about the benefits of joining the largest dental organisation of its kind, with over 66,000 members world-wide, contact:
